

At Techno M.A.G, we are always striving to make our application better and easier to use for our customers.

We are using our 20 years of experience, we are in contact with professional people like speech therapists and occupational therapists as well with parents and users themselves, all in order to better understand the user's needs.

iMyVoice Lite has been released initially as free app in order to enable evaluation and aptness for the user.

Over the last year we have received many requests to enable full functionality of the app, at a lower price than that of the full version - iMyVoice SymbolStix.

After some thought and consultation, we decided that the best approach is to move iMyVoice Lite from a freeware application to a monthly subscription application, for a low cost each month, with the first month free.

This way,

- Users will have access to All the functions iMyVoice Lite has to offer, for a lower cost than purchasing the full version of iMyVoice SymbolStix.
- Users will be able to unsubscribe at any time.
- Users that already had downloaded the app and decide not to use the app anymore, can unsubscribe free of charge , on the first month.

We truly believe that this change will answer the needs of our customers and give them the possibility to communicate in the best conditions.
